

Rebuilding Together Petaluma Security Cameras

On Saturday December 7, 2024, a team of Petaluma Sunrise Rotary Club volunteers installed 4 Pan / Tilt / Zoom cameras around the periphery of the Rebuilding Together Petaluma property at 301 Payran St, Petaluma, CA 94952.

The technology was funded by the Petaluma Sunrise Rotary Club, and the volunteers were from that same club. The project started at 9am and the last member left at around 12:30 pm.

The biggest challenge was drilling holes through concrete block walls to fish wires through while standing on 10+ foot ladders. The coverage objective was to capture as much of a 360 degree view of the property as possible. These cameras detect movement and sound and can then track movement, keeping the property and the materials on the property safe.
